Yes, that is true. Phases 1 - 4 are already in Scribe. Greg has looked at the data and had some concerns about it and mentioned that phase 3 and 4 may need to be reloaded. ESAT said that the data or EDDs from Shaw are in a different format than the others. I believe what Greg was trying to get were the original bench sheets and EDDs from the respective labs phases 1 - 4 and also the phase 5 data.

Can we have a conference call with Rob and Deb sometime today and talk about this? Greg was handling this and ESAT and I have been waiting on further instructions.

Thanks,

Rob seems to think ESAT has already created EDDs for the Ph III-IV data. If that's true, then all they really need are the EDD PhV data, yes?

Ayn, I am around today, but have a few meetings and I am working on some other things that might take up my day. I know that ESAT created EDDs from ORD's data from Phase 3 and 4 (that's a TMA

sentence - too many acronyms). I don't know if that has been completed or with the Phase 5 data though.

I'm not sure if I ever received the Phase 3 and 4 EDDs created by ESAT; they may have just created them and stuck them in the database without passing them through me. I can check though.

Hello Ayn -

We have gone through the Phase II, IV exercise in the past. All of the data reports are posted on the R8 site. I thought that Rob Parker, long ago, had EDDs created from the data reports.

Phase V data are all on the L: drive. Greg has had access for some time; I also do not know where he is at with this. I'll leave it to Dave to figure how others can get access to the L: drive. It be faster to have someone burn all of the Phase V reports to a CD and send, not sure?

Rick

Another 'covering while Greg is conveniently on another continent' item I'm hoping you can help me with. I am trying to figure out how to provide the ESAT contractor that is working up the SCRIBE database for data from all Pavillion phases with access to the EDDs for Phases III-V so they can get cranking with QA/QCing the data flagging for the Ph III/IV and with entering the PhV data. Are the EDDs posted somewhere that we can provide the contractor with access? I vaguely recall Greg indicating that they are on the L drive, but don't know if that's right or specifically where on the L they might be. If that is where they are housed, what would be involved in getting access to several ESAT folks? Or is there an alternate way to quickly provide them with the EDDs? Jim Martin is apparently getting big pressure to get this done, and I'm not even sure exactly where Greg was at with it. So pardon my johnny-come-lately ignorance, but if you can help sort this out, I will owe you BIG TIME. The critical ESAT player is Scout Dellamia, but it would also be helpful for Janelle Lohman and Jim Slavens to have access.

Ayn,

Here is the Scribe subscription that I sent to Deb and Greg for Pavillion phases 1 - 4 data. Phase 5 has not been loaded into Scribe yet. I also ran a test of the data for Greg and that is where he had some concerns about a lack of consistency between the labs. I have attached that Excel spreadsheet.

Please let me know how you want to proceed and we will get it done as soon as we can. The time estimate from ESAT is 200 man hours based on the amount of hours required for the first four phases.

Deb and Greg,

A new Scribe.net subscription has been created and published for Pavillion Phases 1 - 4. Please see the email below with the log on information for it. I am telecommuting today. Please let me know if you have any trouble retrieving the data.

Jeff/Scout,

The latest Pavillion Scribe Project (1845) is now available on Scribe.NET. The subscription information is as follows:

Subscription ID = (b)(6) privacy

Password = (b)(6) privacy

The old project (1267) has been removed from Scribe.NET to avoid confusion. Please let me know if you have any questions or require additional information.

Thank you,
